

Most of the remaining gap is associated with timing rather than selection

ratio to optimum

Random   timing-related loss  selection-related 0.757

Static greedy    0.775

Supervised scorer    0.846

Temporal greedy    0.894

Value-based policy    0.907 timing = 80.9% of this gap

0 250 500 750 1000 1250 1500 1750

Value gap to the model-defined optimum (objective units)
